

KEY FEATURES

- ColorStream Pro® Component Video Output
- Digital Cinema Progressive (3:2 Pulldown)
- JPEG Photo Viewer

- WMA & MP3 Playback
- Virtual Surround Sound
- Coaxial Digital Audio Output

- Digital Picture Zoom
- Screen Saver
- Front LED Display

ADVANTAGE TOSHIBA

- >> ColorStream Pro® Progressive Scan Component Video Outputs are offered to enhance color purity and image detail.
- >> Virtual Surround Sound recreates dynamic multi channel surround sound from two stereo speakers.
- >> DVD-VIDEO/CD/VCD playback. The various disc formats, DVD-R/CD-R/CD-RW, Toshiba DVD players will playback broaden the functionality of the standard DVD player.
- >> JPEG Photo Viewer enables users to seamlessly display digital photographs from disc onto their televisions.
- >> Play MP3 and WMA files effortlessly from compatible CD-R and CD-RW discs.

TECHNOLOGY & BENEFITS

VIDEO

- >> **ColorStream Pro® Component Video Outputs** - These outputs allow the video signal to be sent from the DVD player to a component video equipped interlaced or progressive scan TV. When this connection is utilized with today's HD-compatible sets, typical NTSC artifacts-like video noise, dot crawl, and flicker-are virtually eliminated, resulting in a low-noise, highly detailed picture with unequaled color purity.
- >> **Digital Cinema Progressive (3/2 Pulldown)** - Delivers the smoothest, most film-like images to any progressive scan television, such as an HD-compatible one, and ensures maximum resolution.
- >> **JPEG Viewer** - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

AUDIO

- >> **WMA & MP3 Playback** - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.
- >> **Coaxial Dolby® Digital and DTS® Surround Sound Output** - Use the single RCA-type jack to send signature multi-channel audio to an audio/video receiver with a compatible input.
- >> **Virtual Surround Sound** - Provides a simulated surround sound effect when using two stereo speakers. Convenient when playing DVD films with home theaters not equipped with multi-channel playback compatibility.

CONVENIENCE

- >> **Digital Picture Zoom** - This interactive DVD feature allows you to select an area of the picture you want to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when you're zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.
- >> **Screen Saver** - The player can be set to automatically go into a screen saver mode after several minutes of inactivity. While in this mode, the Toshiba DVD logo appears and "ping-pongs" across the screen. Many movies will display the main movie menu indefinitely after the movie has ended. If left onscreen for a prolonged period, burn-in on the TV screen may result without this feature.
